RE: Notice of Data Security Event Relating to North Dakota Residents

Dear Office of the Attorney General:

On August 15, 2020, Carnival Corporation & plc detected unauthorized third-party access to portions of the company's information technology systems. Carnival acted quickly to shut down the intrusion, restore operations, and prevent further unauthorized access. Additionally, an investigation was immediately commenced with assistance from leading cybersecurity forensics experts to determine what happened and what information was affected. Carnival also notified law enforcement about the incident.

On October 6, 2020, Carnival determined that the affected systems contained unencrypted personal information for a North Dakota resident, and to date, Carnival has identified personal information for two North Dakota residents. Our analysis and review are still ongoing. There is currently no indication of any misuse of this information.

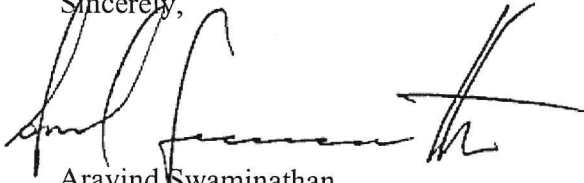

While the investigation of the data involved in the event is ongoing, Carnival published a news release and website notices on October 13, 2020 to keep individuals informed and outline some precautionary steps. Carnival expects to conclude its investigation of the data in the next 30 – 60 days and will then send individual notifications to potentially impacted individuals whose current contact information is available to the company. We will update you, once that notice process is complete.

As part of its ongoing operations, Carnival is continuing to review security and privacy policies and procedures and implementing changes when needed to enhance information security and privacy controls.

If your office requires any further information in this matter, please contact me at 206-839-4340 or aswaminathan@orrick.com.
